

Steadfast

T-Fix Instructions

	<p>1. In cold conditions immerse tubs A and B in warm water for 30 minutes. This will loosen the product for ease of application.</p>
	<p>2. Using wet gloves, take one Part A and one Part B of equal size. Keep gloves wet throughout operation to prevent stickiness during application.</p>
	<p>3. Mix A & B together until a consistent grey colour is achieved. If a period of time elapses before use submerge product in water this will extend the working time.</p>
	<p>4. Apply a small amount to each of the intended substrates and press firmly together. Tool off using a trowel or wet sponge.</p>
	<p>5. With the aid of wet gloves, apply and mould to required profile. This can also be achieved with water and sponge. Alternatively allow to cure and sand or grind down to suit.</p>

KEEP OUT OF REACH OF CHILDREN

If medical advice is needed, have product container or label at hand.

Storage

Store T-FIX in a dry, well ventilated storage area between 5°C and 35°C. Shelf life 12 months. If in doubt contact Steadfast and provide the batch number on the packaging. Do not let the product come in to contact with ground water, surface water or sewage system. Dispose of contaminated packaging and remnants according to legal regulations.
