

EFFLORESCENCE CLEANER

DESCRIPTION

Professional calcium & efflorescence cleaner.

Targeted removal of stubborn deposits.

Total Wall Care EFFLORESCENCE CLEANER is a high-performance formula for cleaning all types of external masonry, brick, granite, and other natural stone surfaces. It's powerful, fast-working formula is easy to use with a sponge, brush, or sprayer. Ideal for environments with high levels of salt air which can naturally create high calcium deposits and for tidying up after building works - it dissolves and removes efflorescence and cement mess from acid resistant natural stone.

DIRECTIONS

Before use, remove any loose debris from the work surface and ensure you have adequate personal protection, i.e., gloves, suitable protective eyewear, face mask & clothing.

1. Total Wall Care Efflorescence Cleaner is to be used neat or diluted up to 1:5 with clean water - always perform a small test area to determine suitable dilution rate and dwell time.
2. First wet the surface, then apply Total Wall Care Efflorescence Cleaner, neat or diluted with water up to 1:5, dilution rate will be dependent on the extent of the contamination.
3. Immediately spread the product evenly on to the surface with a sponge, brush, or sprayer. Leave to dwell for 10-15 minutes, scrub the surface then wash away with plenty of clean water. Do not allow the product to dry on the surface. In cases of heavy contamination, it may be necessary to repeat this procedure.

Please Note: Total Wall Care Efflorescence Cleaner is not suitable for polished or finely honed stone surfaces which are sensitive to acid, such as limestone, marble, manufactured stone, etc.

Important: In cases of doubt, test the product on-site in an inconspicuous area first to determine the suitability of Total Wall Care Efflorescence Cleaner. This test is important as permanent damage to acid sensitive surfaces can occur. Surfaces such as chrome, enamel, wood, and other acid sensitive surfaces must be protected against splashes and vapours. Acid containing cleaners can develop vapours which may damage sensitive surfaces.

USAGE GUIDELINES

Dwell Time: 10-15 Minutes

Applications/Coats: 1 to 2 Applications

Application Method: Sponge/Sprayer/Brush

Dilution: Up to 1:5

COVERAGE

15 to 30m² per litre.

Depending on the extent of contamination.

PRECAUTIONS

KEEP OUT OF THE REACH OF CHILDREN & PETS

H314: Causes severe skin burns and eye damage.

H290: May be corrosive to metals.

H302: Harmful if swallowed.

H302+312+332: Harmful if swallowed, in contact with skin or if inhaled.

H315: Causes skin irritation.

H317: May cause an allergic skin reaction.

H318: Causes serious eye damage.

H335: May cause respiratory irritation.

P264: Wash hands thoroughly after handling.

P280: Wear eye protection.

P305+351+338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P301+330+331: IF SWALLOWED: rinse mouth. Do NOT induce vomiting.

P302+350: IF ON SKIN: Gently wash with plenty of soap and water.

P304+341: IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing.

P333+313: If skin irritation or rash occurs: Get medical advice/attention.

P337+313: If eye irritation persists: Get medical advice/attention.
